

Analog ECG Output Adapter – Part# ME550DFB3
Easily connects defibrillators to pacemaker programmers.

Once again, MAGUIRE Enterprises has created a versatile product that improves your work in Cardiac Rhythm Management. By taking into consideration the most current model defibrillators on the market, we've developed the **ME550DFB3**. The advantage of this adaptor is that it provides you with an array of defibrillator connections when used in conjunction with your programmer's cable:

- Physio-Control defibrillator LIFEPAK 12/15
- Physio-Control defibrillator LIFEPAK 20/20e
- Physio-Control defibrillator LIFEPAK 20e with Code Management Module
- Zoll R Series defibrillators (newer units with the 5 pin female output connector)

We understand how important it is that you be prepared to slave from any number devices so we suggest you supplement your purchase with the ME550Z; our adapter that enables connection between your programmer cable and the Zoll M.

The **ME550DFB3** together with the **ME550Z** will equip you for connection to nearly every defibrillator you may encounter. Using these versatile products for Cardiac Rhythm Management makes your work easier.
