

Here is how Maguire Enterprises products

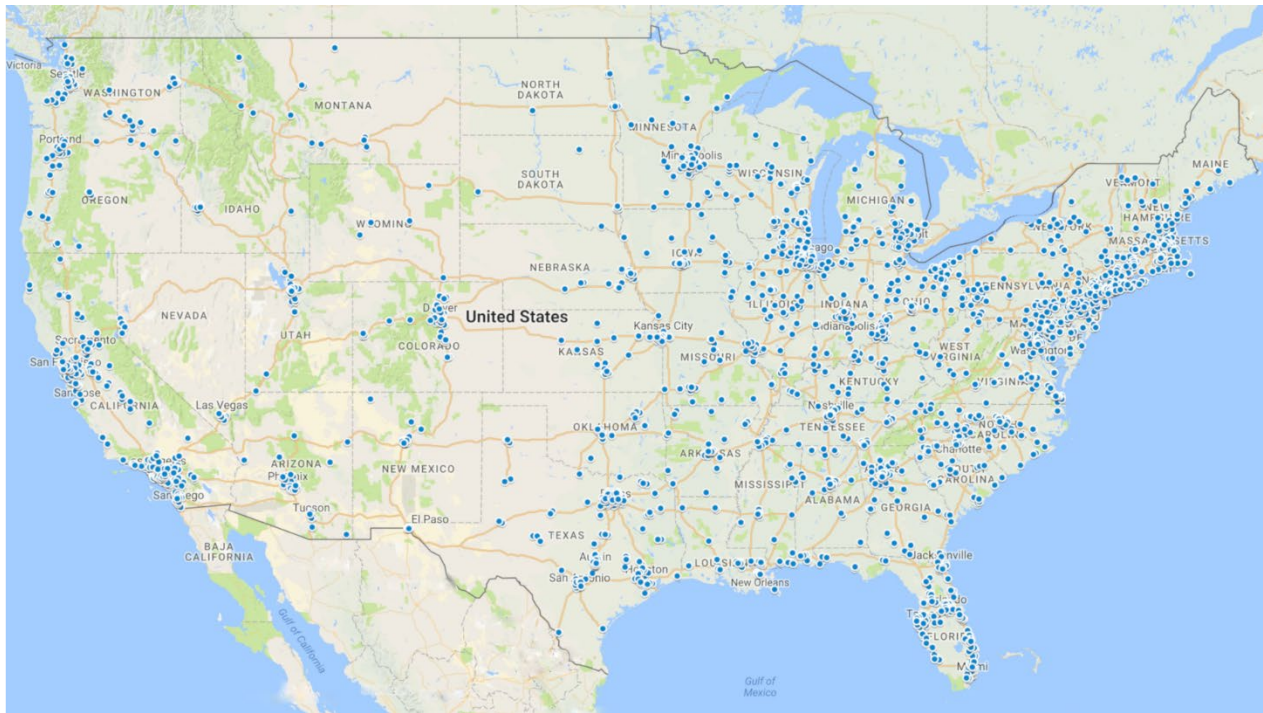

- interconnect cables -

make a big difference in your hospital

- anywhere you monitor ECG and invasive pressure -

1. Reduce staff effort & time for patient setup.
2. Reduce the clutter from redundant sets of patient cables and electrodes.
3. Lessen the opportunity for lead wire contamination and chance of infection.
4. Display matching waveforms across monitors.
5. Remain focused on observation, diagnosis, and delivery of care.
6. Utilize monitoring equipment freely between rooms and departments.
7. Simplify intra-hospital patient transfers.

Proven at thousands of hospitals.
