The most RUGGED CONNECTORS available are used.

Manufactured in an FDA compliant facility in the USA

Maguire Enterprises Device Alarm Nurse Call cables

This product accepts the external alarm from a pulse oximeter, patient monitor, ventilator, infusion pump, or similar medical device equipped with an alarm output. These cable products connect the alarm output of the medical device to the hospital's central station alarm monitoring system. The typical nurse call system input is located at the headwall jack near the patients bedside.

[Ventilator Alarm Nurse Call Cables](#) are recommended by JCAHO for improved patient safety.

[Monitor Alarm Nurse Call Cables](#) are essential for providing safer care to patients in many health care settings.

[Pulse Oximeter Alarm Nurse Call Cables](#) help to provide safer care to patients in many health care settings.

[Infusion Pump Alarm Nurse Call Cables](#) are essential for providing safer care to patients in many health care settings

[Device Alarm nurse call Input Multipliers](#) are an exclusive product of Maguire Enterprises.

These products improve your efforts to meet JCAHO standards for providing safer care across healthcare settings. By increasing the number of available connections at the headwall this product can turn the average room into a more intensive monitored care area. Use the *input multiplier* in tandem with three *normally open* nurse call cables to transmit the alarms of your ventilator, infusion pump, patient monitor, pulse oximeter or other alarm equipped medical devices.
